### DETAILED ACTION

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Species I, depicted in figure 8, and directed to displaying and modifying a first threshold to a second threshold. Claims 34-36 and 42 are drawn to this species.
- Species II, depicted in figure 12, and directed to displaying first and second thresholds and defect candidates with a margin greater than or equal to the second threshold minus the first. Claims 37, 38, 50, 68 and 69 are drawn to this species.
- Species III, depicted in figure 9, and directed to calculating a margin from an inspection and a reference image, and displaying a symbol when the margin is equal to or above a threshold difference. Claims 54 and 55 are drawn to this species.
- Species IV, depicted in figure 16, and directed to determining a plurality of thresholds and displaying a user indication for each threshold. Claims 66 and 67 are drawn to this species.
- Species V, depicted in figure 18, is drawn to displaying thresholds where each type of defect has an associated threshold.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 39-41, 43-46, 48, 49, 51-53 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
